COURSEWORK

Operating System

Database Management Systems

Computer Network

Advance Java Programming

Analysis & Design of Algorithms

Cyber Security

Linux and Shell Scripting

SKILLS

PROGRAMMING

Over 5000 lines:

Java • JavaScript • TypeScript

Over 1000 lines:

C • C++ • SQL

Tools & Technologies:

Spring • Spring Boot • Hibernate

MySQL • MongoDB • HTML

CSS • Vue.js • Nuxt.js • AWS

Git • GitHub • Docker

Apache Maven

Familiar:

Python • Node.js • Express.js •

TailwindCSS • Microsoft Azure

Linux • Shell Scripting

ACHIEVEMENTS

- Selected from **15,000+**

participants for the **Smart India Hackathon 2022** Grand Finals.

- Published two research papers

1st Research Paper, one in IEEE

and another one is under process.

WORK EXPERIENCE

LOADSHARE NETWORKS | SOFTWARE ENGINEER

July 2023 - Present | Bengaluru, Karnataka

- Working on rate rule engine which handles the earnings of the field executives, revenue of the company.
- Building a Ticket Management microservice for field executives to raise tickets from the app.

AMADEUS SOFTWARE LABS | SOFTWARE ENGINEER INTERN

February 2023 - June 2023 | Bengaluru, Karnataka

- Worked on integrating the Open API specification file in API Extension project to automate the process of API code generation and deploy that on **Azure Function App** using **GitHub Actions**, **terraform** and **terraform**.

LOADSHARE NETWORKS | SOFTWARE ENGINEER INTERN

June 2022 - September 2022 | Remote

- Developed COD microservice which enables the current system to accept COD orders (30% more orders).
- Created API for managing zone configs which increased the system efficiency and no. of orders per day by 10%.
- Reduced the manual effort of Ops team in managing zones with the Geo-Spatial queries.
- Upgraded the Spring boot version from 1 to 2 and moved the WAR based deployment to JAR based deployment.

PERSONAL PROJECTS

VIDFLOW | FINAL YEAR PROJECT

GITHUB

VidFlow, a video sharing platform built using **Nuxt 3** and **Spring Boot**, hosted on **AWS**. Its feature set includes infinite scroll, material design, pagination, **JWT** authentication, and role-based endpoint security for a secure and smooth user experience. The platform also manages user's watch history, liked videos, subscribed channels, and integrates content recommendations and real-time spam filtering through **AWS Lambda**.

FELLOWSHIP | SIH 2022 GRAND FINALE PROJECT

GITHUB

Fellowship, a scholarship aggregator developed using **Nuxt 2** and **Spring Boot**, hosted on **Heroku**. It provides personalized scholarship recommendations based on user-specific details. It uses web scraping to collect scholarships from various sources, stores them in **MongoDB**. Scheduled **CRON** jobs maintain data accuracy by removing expired scholarships. The admin panel facilitates seamless scholarship and user data management, allowing administrators to update information and upload scholarships using **JSON** files.
